Summary

Software Engineer with 10+ years of experience specializing in internal tooling, infrastructure, and security remediation at scale. Proven track record of architecting new products, ground-up replacements for legacy systems, and mentoring teams through complex organizational transitions at Meta and AWS.

Skills

Software Engineering: Full-Stack Development, System Architecture, API Design & Integration, Agile Methodology, Technical Mentorship

Cloud & Infrastructure: Amazon Web Services (AWS), Infrastructure as Code (IaC), Cloud Provisioning, Distributed Systems, Remote System Management

Security & Compliance: Security Remediation Tooling, Vulnerability Management, FTC / Oversight Compliance, Privacy Engineering, Risk Assessment

AI & Data: AI Model Integration, AI-Driven Risk Assessment, Metrics & Analytics, Performance Testing

Tools & Technologies: JavaScript, React, Node, PHP, Hack / HHVM, Python, SQL, Git, Unix / Linux, Apache / Nginx

Work Experience

Amazon Web Services / Meta

New York, NY

SOFTWARE ENGINEER VIA CRYSTAL EQUATION

January 2025 – March 2026

- Engaged through AWS to support cloud management and tracking products within Meta.
 - Took on support of tooling used to manage requests and provisioning for accounts with external cloud vendors.
 - Leveraged Large Language Models (LLMs) to rapidly prototype internal interface improvements, achieving a 66% reduction in the design-to-deployment lifecycle for new cloud management features.
 - Optimized workflows for cross-functional teams to reduce lead time on request review from weeks to days.
 - Worked with privacy and security teams to guarantee compliance with FTC and other oversight requirements.
 - Orchestrated the technical handover and onboarding process as the sole engineering resource during a product ownership transition, ensuring 100% knowledge retention for the incoming team.

Meta

New York, NY

SOFTWARE ENGINEER VIA CRYSTAL EQUATION

March 2020 – January 2025

- Integrated with Meta team for creating and maintaining internal security remediation software.
 - Primarily focused on internal tooling designed to expose security vulnerabilities to engineers and track their progress on remediation.
 - Steered the technical roadmap and mentored a rapidly expanding engineering team following a major product ownership transition, ensuring seamless continuity and knowledge transfer.
 - Architected and deployed a ground-up replacement for legacy security tooling, optimizing complex search and metrics requirements to support enterprise-scale vulnerability tracking, rapidly grouping and filtering 30+ million instances of vulnerabilities across the entirety of Meta's infrastructure.
 - Collaborated with cross-functional Security and Data Engineering teams to integrate automated remediation and AI risk assessment into the product, enabling automatic prioritization and remediation of thousands of vulnerabilities which significantly reduced the mean time to resolution (MTTR) for critical security flaws.

BFan Sports

New York, NY

SOFTWARE ENGINEER

June 2015 – February 2020

- Designed systems and features with a focus on fan engagement and asset management for sports teams and clubs.
- Supported platform growth to 50+ international sports organizations, managing data for 70,000+ user accounts.
- Modernized infrastructure by implementing Infrastructure as Code (IaC) on AWS, improving deployment reliability, environment consistency, and allowing for deployment of branded apps for teams in under an hour.
- Completed code review and helped manage pull requests to major company repositories.

Knearn

SOFTWARE ENGINEER, CO-FOUNDER, CTO

New York, NY

June 2013 – April 2015

- Designed and implemented websites for educational and professional mentorship.
 - Initially built with a PHP backend on a standard LAMP stack.
 - Later converted to Meteor.js to make the experience much more interactive and responsive.
- Led and managed a small team of developers aiming to develop features using an agile methodology.
- Worked with business team to come up with solutions and marketing for the project.

McKinsey & Company

IT INTERN

New York, NY

January 2014 – May 2014

- Performed software performance and usage testing to determine fit for use in the company.
- Used experience with SharePoint to give insight to corporate social networking software and file sharing systems.
- Branded software distributions within the company using CSS.

AvePoint

TECHNICAL ANALYST INTERN

Jersey City, NJ

January 2012 – May 2012

- Provided remote assistance troubleshooting company software via phone, email, or remote connection.
- Debugged environments using Microsoft SharePoint, Microsoft SQL Server, Microsoft Server, and other similar products.
- Made simple tools to automate office procedures using raw JavaScript.

McKinsey & Company

IT INTERN

New York, NY

June 2011 – August 2011

- Prepared servers and environments used company wide with UNIX based web software (LAMP, Rails, etc).
- Worked with vendors to get their software running on these servers and customized/configured for use.
- Used software supplied APIs to do migrations of files between versions of user systems.

Education

Stevens Institute of Technology

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

Hoboken, NJ

September 2010 – May 2015

- Participated in the 5 year cooperative education program.
- Involved in managing multiple on-campus organizations.
